

# Chayut Universe Wave Function

## CUWF Core Framework Overview

## CUWF Core Framework Overview

### *Foundations, Structure, and Dynamical Law*

---

A self-contained reference for the core structure of the CUWF theory, intended to support readers before or during engagement with the CUWF papers.

**Author:** Chayut Techasamran

**Date:** 15 August 2025

### Document Status

Standalone Reference Document (Not part of any CUWF paper series)

Version 1.0

### Abstract

This document presents the core structural framework of the Chayut Universe Wave Function (CUWF) theory in a self-contained form. It defines the minimal ontological commitments of the framework through four foundational primitives, organizes the resulting conceptual constraints into a set of twenty-three core principles, and introduces the canonical dynamical law governing the evolution of the system.

The purpose of this document is not to derive results or resolve specific physical problems, but to provide a stable structural reference for understanding how the CUWF framework is

constructed and how its components relate to one another. It is designed to be used independently of the main CUWF papers, allowing readers to establish a coherent conceptual map before or during engagement with the all CUWF PAPERS.

By separating structural definition from domain-specific analysis, this document enables consistency, clarity, and reusability across the CUWF theory as a whole.

### Keywords

CUWF, foundational framework, entropic structure, collapse dynamics, relational geometry, wave-based ontology, master equation

### Document Note

This document serves as a standalone reference layer of the CUWF theory. It is not assigned to any specific paper series and should be treated as a canonical structural reference for all CUWF papers.

## Table of Contents

Section 1. CUWF Framework Overview

Section 2. Structural Organization of the CUWF Framework (From Primitives to Principles and Pillars)

Section 3. Four Primitives as the Foundational Ground

Section 4. The 23 Core Concepts and Their Organization into Six Pillars

Section 5. Canonical Master Equation (Four Equivalent Forms)  
- A Multi-Level Explanation

Section 6. The Learning Ladder (how different minds should enter CUWF)

Section 7. Common Misreadings and the Built-In Safeguards

Section 8. A Minimal Working Example (to anchor intuition)

Appendix — Canonical Symbols and Variables in CUWF
